

The Claude Shannon Centenary Ceremony

May 8th 2016 (Sunday, 19th of Ordibehesht)

Tarbiat Modares University

Tehran, Iran

The *Shannon Centenary*, 2016, marks the life and influence of Claude Shannon on the hundredth anniversary of his birth on 30 April 1916. Shannon is best known for developing the mathematical foundations of communication and establishing the field of information theory, data compression, digital computers, cryptography, circuit complexity, flow networks, and juggling, as well as laying foundations of artificial intelligence and human-computer interaction.

Alongside many parts of the world, the Shannon Centenary Ceremony will be held in Iran on May 8th at Chamran Amphitheater, Tarbiat Modares University, Tehran, Iran. The event will start at 09:00 AM and includes series of interesting talks and networking breaks.
